Arc Infrastructure is a major contributor to the growth of Western Australia’s economy and we support the community by employing, living and buying local.

our commitment to the goldfields and esperance

We connect WA people and products to the rest of the country and the world. Safely connecting and contributing to Western Australian communities is what we do, and we’re in it for the long haul.

Our Kalgoorlie and Esperance teams are central to this commitment. They are responsible for the upgrade and maintenance of one of the busiest and most vital sections of the rail network, the Eastern Goldfields Railway (EGR), as well as the Leonora and Esperance lines. The region’s 870km of infrastructure includes numerous level crossings as well as signals and communications equipment.

Our ongoing investment into the optimisation and upgrade of the EGR and the Leonora and Esperance lines ensures we continue to provide the critical infrastructure required to connect WA with national and global markets.

Since Arc Infrastructure was awarded the long-term lease of the railway in 2000, we’ve invested almost $840 million into our infrastructure throughout the Goldfields-Esperance region.

Our commitment to the Goldfields-Esperance region extends far beyond investment into our infrastructure.

We contribute to the economic growth and development of the region by employing local people, engaging with industry, buying from local business, working in partnership with our customers, supporting community initiatives and protecting the environment.

We make a real difference by partnering with community organisations to achieve meaningful outcomes. On average, Arc Infrastructure makes a direct contribution of more than half a million dollars to regional WA each year in the form of community partnerships, cash and in-kind donations and volunteering hours.

we understand the needs of industry are constantly changing, and we’re quick to respond by improving the rail network to support new projects and economic growth.
Arc Infrastructure is committed to actively participating in the communities where our people and their families live. We reach out to our teams to find out what is important to them and where their community needs help the most. Recently our Goldfields teams hosted a car wash and sausage sizzle to raise much-needed funds for the Goldfields Children Charity, a Kalgoorlie-based and locally run charity supporting Goldfields families with financial assistance in times of need when their children are sick or injured.

The team’s efforts raised $5,000, assisting the organisation to help local families.

**we buy local**

Wherever possible, Arc Infrastructure endeavours to source products and services from local suppliers.

We know that by buying local we are not only supporting local businesses, but also the growth and development of the communities they operate within.

Some of our contractors and suppliers have been working with us for decades, and their ongoing support is invaluable to the day to day operation of our network.

“**I enjoy my job, because I am part of a team where everyone counts. Rail maintenance delivery is not only a job, it’s a lifestyle, and sharing that lifestyle with 40 fellow team members in the Goldfields, who all have the same goal, is very rewarding.”**

Jonathan
Maintenance Delivery Team, Goldfields

**we collaborate with industry**

Arc Infrastructure leads policy and discussion around more than just WA’s rail freight network.

We are members of international and national associations including the Australasian Railway Association, Australian Logistics Council and the Rail Industry Safety and Standards Board.

Some of our contractors and suppliers have been working with us for decades, and their ongoing support is invaluable to the day to day operation of our network.

We actively contribute to groups that share our vision of connecting the Goldfields and Esperance to other WA communities and to the rest of the world, including the Committee for Economic Development Australia, Chamber of Minerals & Energy and the Regional Development Commissions.
Arc Infrastructure manages transport infrastructure in Western Australia.

We currently operate Western Australia’s 5,500km freight rail network, connecting people, commodities and ports across the State with the rest of Australia and the world.

Spread across regional Western Australia, our team of 430 employees keeps the rail network operating 24/7.

We live local, buy local and are committed to contributing to regional communities.

While rail remains at the heart of the Arc Infrastructure business, we are ready to do more.

We’re committed to working with industry, our customers, partners and communities to find new opportunities that will support and strengthen our rail network for the benefit of WA.

Who are we?

Our local footprint

We live local, buy local and are committed to actively participating in the regional communities where we operate.
