

SAFETY DIRECTIVE

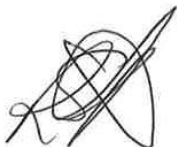

Network Safeworking Rules and Procedures Forms

Attention All Network Users

Arc Infrastructure 2020 Rule changes have been made to complement our new Network Control System. This system is not due to roll out until mid 2020, as such the Movement Authority forms required for the movement of trains in Train Order Territory and the movement of Track Vehicles on both Centralised Traffic Control Territory and Train Order Territory will not be available for use.

Authority for train movements in Train Order Territory will be issued on Train Order Forms, and Authority for Track Vehicle movements in Centralised Traffic Control Territory and Train Order Territory will issued on Road Rail Vehicle Authority Forms.

The Movement Authority Issue and Receipt forms will be used when the new Control system is commissioned and rescinding of this safety directive will occur at that time.
