

# SAFETY DIRECTIVE

## Use of Rule 2001 & 3013 in Avon Valley

---

**Project lookout identified several locations where sighting distance is inadequate for the application of Lookout working (Rule 3013).**

The Avon Valley was identified as a high risk area and as such the use of 'Lookout Working' (Rule 3013) between Toodyay West and Millendon Junction is prohibited.

Rule 2001 'Walking in the Danger Zone' may be used between Toodyay West and Millendon Junction, but employees are reminded that the rule is not a form of protection and may only be used to cross the danger zone after confirming with network control that rail traffic is not in the vicinity.
